

Criterion E: Evaluation

1. Evaluation of the product

Nr	Description	Evaluation
1	Is able to authenticate users through login credentials	Score: 10/10 (Appendix A) The Login Page works exactly as intended and allows for user verification which can be updated by the client at any time.  The screenshot shows a mobile application interface for a login page. At the top, there is a blue header bar with the text 'Login Page' and a three-dot menu icon. Below the header, there is a large, light blue square containing a logo. The logo consists of the word 'Students' in a bold, black font, followed by a stylized 'f' and 'r' with a blue cube in between, and the word 'studentS' in a bold, black font. Below the logo, there is a 'Login' button. Underneath the button, there are two input fields: 'Username / Email' and 'Password'. Below the input fields, there is a 'Login' button. At the bottom, there is a status bar that says 'Checking credentials...'. <i>Figure 1: Login Page</i>

2

Matches students correctly with suitable tutors using a compatibility algorithm with at least a 90% success rate

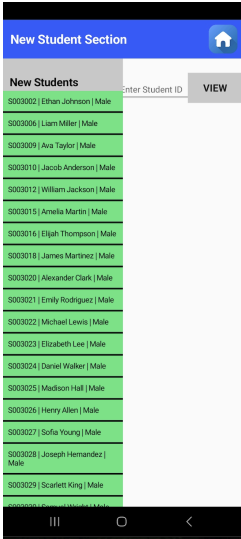

Score: 9/10 (Appendix A)

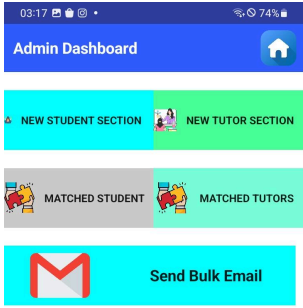

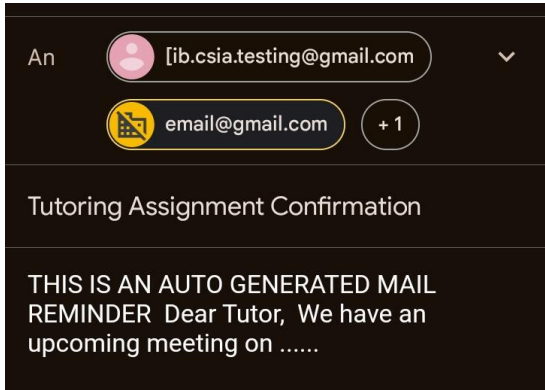

The client stated “Even though the best almost always falls within the three it would be helpful to have the ability to scroll”(Appendix A)

A Scroll View could become relevant as the database of tutors grows and multiple tutors are equally compatible with the student.

Figure 2: Recommended Tutor Screen

3	Reduces the time my client takes to match students with tutors to under 1,5 min	 Score: 9/10 This is the time recorded for the fastest trial from opening the app to matching up the student out of 5 trials. Even the worst one was 73.18s which was below 90 seconds, but the client mentioned that “sometimes typos in student ID, etc can delay the process”. (Appendix A) Figure 3: Fastest Time recorded																																																																																																
4	Imports student/tutor data from Google Sheets	Score: 10/10 Works as intended. Imports data and registers real-time changes such as updated login credentials.																																																																																																
5	Updates Google Sheets with matchup ID once students get matched up	<table><tr><th></th><th>O</th><th>P</th><th>Q</th></tr><tr><td>xu</td><td>TutorID</td><td>MatchedID</td><td>Tutor Rating</td></tr><tr><td></td><td>T003001</td><td>M-S003001-T00</td><td></td></tr><tr><td></td><td>T003002</td><td>M-12345-7586</td><td></td></tr><tr><td></td><td>T003003</td><td>M-S003004-T00</td><td></td></tr><tr><td></td><td>T003004</td><td>M-S003003-T00</td><td></td></tr><tr><td></td><td>T003005</td><td></td><td></td></tr><tr><td></td><td>T003006</td><td></td><td></td></tr><tr><td>9</td><td>T003007</td><td>M-S003013-T00</td><td></td></tr><tr><td>l</td><td>T003008</td><td>M-S003019-T00</td><td></td></tr><tr><td>e</td><td>T003009</td><td></td><td></td></tr><tr><td>ite</td><td>T003010</td><td></td><td></td></tr><tr><td>3n</td><td>T003011</td><td>M-S003011-T00</td><td></td></tr><tr><td>3s</td><td>T003012</td><td></td><td></td></tr><tr><td>n</td><td>T003013</td><td></td><td></td></tr><tr><td></td><td>T003014</td><td></td><td></td></tr><tr><td>e</td><td>T003015</td><td></td><td></td></tr><tr><td>3d</td><td>T003016</td><td>M-S003014-T00</td><td></td></tr><tr><td>g</td><td>T003017</td><td></td><td></td></tr><tr><td>n</td><td>T003018</td><td></td><td></td></tr><tr><td>hit</td><td>T003019</td><td>M-S003005-T00</td><td></td></tr><tr><td>e</td><td>T003020</td><td></td><td></td></tr><tr><td>3n</td><td>T003021</td><td></td><td></td></tr><tr><td>3n</td><td>T003022</td><td>M-S003017-T00</td><td></td></tr></table> Score: 10/10 (Appendix A) Works as intended and updates in real-time. 6	Displays a list of all current unmatched students that can be matched	 New Student Section New Students Enter Student ID VIEW - S003002 Ethan Johnson Male - S003006 Liam Miller Male - S003009 Ava Taylor Male - S003010 Jacob Anderson Male - S003012 William Jackson Male - S003015 Annela Martin Male - S003016 Elijah Thompson Male - S003018 James Martinez Male - S003020 Alexander Clark Male - S003021 Emily Rodriguez Male - S003022 Michael Lewis Male - S003023 Elizabeth Lee Male - S003024 Daniel Walker Male - S003025 Madison Hall Male - S003026 Henry Allen Male - S003027 Sofia Young Male - S003028 Joseph Hernandez Male - S003029 Scarlett King Male - S003030 Benjamin Green Male Score 9/10 (Appendix A) The client stated that “formatting could be a bit more user-friendly and perhaps able to expand when clicked on.”(Appendix A) This format forces them to type the Student ID to view the full profile. This requires a bit more time than just selecting the desired Student. <i>Figure 5: New Students List</i>
---	---	--

8	Has an easily navigable graphical user interface (based on client feedback)	Score 8/10 (Appendix A) The client has said that they liked to user interface and it was easy to navigate, however, stated it was simplistic and the UI could be made more visually appealing.   <i>Figure 7: HOME Page</i>
9	Includes error handling to manage invalid data entry from the client	Score 5/10 Error handling is included throughout and appropriate notifications are sent in case of errors. However, the system assumes the same Google Sheets column order. In case of changes to the column order, the data can get mixed up and cause issues.
10	Can send emails to all tutors or students	Score 8/10 (Appendix A)  “Could have more templates instead of just a meeting reminder.” (Appendix A) Currently, the client needs to type all other emails manually other than meeting reminders. <i>Figure 8: Prewritten Email</i>

Word count: 289

2. Recommendations for further development

2.1. Improvements Based on Client Feedback:

- Instead of having to search for the student and tutor individually, it would be nice to have a feature in which you can search the matchup ID and then the information of the tutor as well as the student appears on the same page(Appendix A)
- Instead of the admins writing each email by themselves, it would be nice to have different templates for scheduling an interview, sending a feedback form, calling a meeting, or reminding them of a task (Appendix A)
- The list format could be changed so that instead a List Picker is used in which Tutors/Students can be clicked and their full profile is automatically displayed on the right.

2.2. General Improvement:

- Instead of storing the password as plain text in the spreadsheet, it could be encrypted using a unique method only known to the client before it is stored for added data security. (Appendix A)
- If there are any critical changes or if unmatched students have not been matched for more than 48 hours, the admin can be notified(Appendix A).
- The login page could be further utilized to allow access for different levels of admins. For example, Luisa and others could be put into a view-only mode where they are not able to change data or make matchups.
- Currently, the App relies on the Google Sheets column to be exactly as intended. Changes in the order could alter the imported data and cause errors. An algorithm could be added to import the data based on the column header and not the column's index as is done currently.
